Bespoke Wayfinder Fingerposts

TECHNICAL DATA

The ever popular Goose Foot fingerpost is a complete signage solution. It is available in either stainless steel or mild steel, galvanised and powder coated as a more cost effective alternative. With the addition of adjustable fingers mounted on several levels, this flexible system allows for adjustments during installation.

Fingers are mild steel powder coated or made from stainless steel for a robust and impressive finish. Each finger is sign written to specification using die-cut vinyl.
